Jim, I will be attaching a copy of a Prouty interview from Publishers' Weekly of 4/2. The underlining was not by me. What I would particularly underscore to you is his references to a composite in Latin American CIA overthrowns. From his Bay of Pigs work as well as from this it is inevitable that he knew Hunt, yet there is no mention of that name. This is even more unusual when Hunt would attract considerably more attention to the book, the ostensible purpose of all the publicity. In this as in his erroneous blame-placing he is actually protecting some one or some elements in the CIA. I don't think it is because he doesn't know what is right and accurate. HW 4/17/73
